

Defence Freight Services

Our global network provides a complete freight forwarding solution for your military and defence contract shipments. From receiving, handling and distribution services to cargo facilities, including sea-freight containers. We offer all services for your military and defence cargo movements by air, sea or road, including part and full charter options.

Our global network has strategically located secure storage space and all the facilities you would expect including a secure Bonded and approved Section 5 explosive storage. Our staff are trained to IATA standards for dangerous goods, so you can be confident your consignments are safely and legally stored at all times.

With a focus on Trade Compliance, we can provide expert advice on important country and international requirements including ITAR, to ensure you stay legally compliant.

Packing & Stock Control

Packing is an essential part of the supply chain. We offer pick and pack, re-packing and hazardous packing services, all tailored to your needs. We can also arrange to inspect certificates of conformity and conduct quality control checks to your standards.

We know just how vital an efficient stock control system is to your business. So we can link into your existing stock system or you can let us do it for you with our own bespoke stock control system and procedures, providing reports on a regular basis.

AOG

Our highly experienced team are fluent in ground handling services including urgent AOG shipments and aircraft loading and unloading including cargo build-up and break-down services.
